

`CURLINFO_CONTENT_LENGTH_UPLOAD(3)`

NAME

`CURLINFO_CONTENT_LENGTH_UPLOAD` – get the specified size of the upload

SYNOPSIS

```
#include <curl/curl.h>
```

```
CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_CONTENT_LENGTH_UPLOAD,
                           double *content_length);
```

DESCRIPTION

Pass a pointer to a double to receive the specified size of the upload. Since 7.19.4, this returns -1 if the size isn't known.

PROTOCOLS

All

EXAMPLE

TODO

AVAILABILITY

Added in 7.6.1

RETURN VALUE

Returns CURLE_OK if the option is supported, and CURLE_UNKNOWN_OPTION if not.
